**DESDE 1964**  
SINCE 1964

**5 unidades de produção  
em Portugal**

5 production plants in Portugal

**Presente em mais de 70 países**  
Present in over 70 countries

**Há mais de 50 anos que trabalhamos para levar até a si cerâmica intemporal. Juntamos a matéria e a energia com a quinta-essência da nossa imaginação para fazer produtos que se projetam no futuro com arrojo e modernidade.**

**Conhecimento e experiência, passados entre as gerações dos pioneiros e uma equipa técnica jovem e dinâmica, permitem à CINCA um domínio inigualável das técnicas e soluções cerâmicas.**

We have been working for over 50 years to bring to you timeless Ceramics.  
We combine substance and energy together with the fifth element of our imagination to make products that project boldness and modernity into the future.

Knowledge and experience passed through generations, from the pioneers to a young and dynamic technical team allow CINCA an incomparable control of techniques and ceramic solutions.

# Qualidade, Design e Serviço

## Quality, Design and Service

## OFERECENDO SEMPRE AS ÚLTIMAS TENDÊNCIAS

Nasceu na mágica década de 60, raiava o ano de 64 e nenhuma outra forma de descrever a CINCA seria tão nobre como dizer que se pauta, indubitavelmente, por itens que tatuam na sua actividade qualidade, rigor e profissionalismo.

Os produtos cerâmicos CINCA permitem criar um ambiente personalizado e elegante, qualquer que seja o espaço em que são aplicados - casas de banho, cozinhas, centros comerciais, fachadas etc, ao que acresce a imensa vantagem de exigirem muito pouca manutenção e de serem um produto natural, resistente ao fogo e não alergénico.

O Serviço ao Cliente é uma das prioridades da CINCA. Como tal, foram efectuados investimentos consideráveis num sistema integrado de informação e comunicação, de forma a permitir aos clientes uma ligação directa aos nossos serviços.

## ALWAYS OFFERING THE LATEST TRENDS

Born in the magical years of the sixties, in 1964, there is no other way of describing CINCA than considering it as noble as to say that items are tattooed in its business such as quality, accuracy and professionalism.

The quality of the products has always been the main concern for CINCA. Whatever the purpose of the tiles, they are always made with the finest raw materials purchased from the market leaders. CINCA wall and floor tiles are manufactured exclusively with white body and meet the most strict international quality norms. CINCA ceramic products allow you to create a personalized and elegant setting, in whatever space they are applied - bathrooms, kitchens, shopping malls, facades etc, to which is added the huge advantage of requiring very little maintenance and being a natural product, fire resistant and non-allergenic.

Customer Service is one of the priorities of CINCA. As such, considerable investments were made based on an integrated system of information and communication in order to allow the customers direct access to our services.

**Com uma presença continuada, desde há longos anos, nas principais feiras de cerâmica a nível mundial, casos da CERSAIE (Itália) e COVERINGS (U.S.A.), a CINCA não descarta uma maior proximidade com os seus clientes, levando também as suas últimas novidades a feiras de impacto mais regional.**

**A CINCA mantém uma estreita colaboração com gabinetes de design mundialmente conhecidos, podendo, assim, satisfazer as novas preferências dos consumidores e simultaneamente as necessidades dos arquitectos e urbanistas, sempre em busca de novas cores e de novas combinações de produtos. A gama CINCA, com a sua grande variedade e flexibilidade, permite a qualquer cliente encontrar a melhor solução para a renovação dos seus espaços.**

With a continued presence, for many years in major exhibitions of ceramics worldwide, for example Cersaie (Bologna - Italy) and COVERINGS (U.S.A.), CINCA does not neglect a closer relationship with its customers, taking also its latest developments to more regional fairs.

CINCA keeps a close collaboration with world renowned design offices, and can so meet the new preferences of customers and simultaneously the needs of both the architects and planners, always looking for new colors and new combinations of products. The CINCA range, with its great variety and flexibility, allows any client to find the best solution for the refurbishment of their spaces

# CUIDAR DO FUTURO

## TAKING CARE FOR THE FUTURE

**Os pavimentos e revestimentos cerâmicos da CINCA são fabricados usando as Melhores Técnicas Disponíveis (MTD ou BAT - Best Available Techniques) para a indústria cerâmica, reduzindo o consumo de energia e recursos naturais a um mínimo.**

**Em condições normais de utilização, a esperança de vida dos pavimentos e revestimentos cerâmicos é superior a qualquer outro produto destinado à mesma aplicação. Os produtos cerâmicos são considerados completamente inertes e não é necessário qualquer cuidado especial no seu tratamento como resíduo. Na eventualidade de renovação, os ladrilhos cerâmicos podem ser facilmente recicláveis e usados como matérias-primas para outras indústrias. Todos os materiais de embalagem (caixas, plásticos e paletes) são totalmente recicláveis e podem facilmente ser reutilizados.**

The manufacturing of CINCA's wall and floor tiles is based on BAT – Best Available Techniques in the industry, with the aim of reducing natural resources and energy to a minimum.

Under normal conditions of use, life span of ceramic wall and floor tiles is higher than any other product conceived for the same use. Ceramic products are considered inert and no particular care is required in its treatment as a residue. In the event of replacement, ceramic tiles are easy to recycle and may be used as raw materials for other industries. All packaging materials (boxes, plastic and wooden pallets) are totally recyclable and easily reutilized.

# safetile

clean and protect

## Testes de Normas Internacionais

Teste Antibacteriano (ISO 27447):  
redução de mais de 95% de colônias  
de bactérias no espaço de 4 horas

Teste Antifungos (ISO 27447):  
redução de mais de 85% de colônias  
de fungos no espaço de 4 horas

Recomendado para:

## TECNOLOGIA ANTIBACTERIANA para espaços mais limpos e seguros

**INSTITUIÇÕES DE SAÚDE  
LARES DE TERCEIRA IDADE  
ESCOLAS  
HOTELARIA**

A CINCA utiliza uma fina camada superficial de nanopartículas submetida a um processo térmico especial para criar as características associadas ao safetile. Estas nanopartículas, com diâmetros geralmente inferiores a 100 nm, ligam-se quimicamente com a superfície da cerâmica durante o processo térmico, permitindo à superfície da peça adquirir propriedades auto esterilizantes na presença de luz natural ou artificial. Como resultado, a existência de bactérias e fungos é amplamente reduzida nos pavimentos e revestimentos SafeTile, promovendo-se igualmente a decomposição de outras substâncias como compostos orgânicos voláteis (COV) e óxidos de azoto (NOx) potencialmente presentes nas atmosferas poluídas. Os produtos SafeTile da CINCA têm a capacidade de decompor material orgânico e desativar microorganismos vivos comuns, reduzindo eficientemente a presença de bactérias, fungos, poluentes gasosos e até mesmo odores.

Os produtos SafeTile são especialmente recomendados para projetos públicos ou privados de grande escala, onde as propriedades auto-esterilizantes e super hidrofílicas são fatores de decisão fundamentais, como em hospitais, centros de saúde e lares para idosos, áreas públicas de grandes dimensões e revestimento externo em edifícios de múltiplos andares, para citar apenas alguns.

Na construção residencial, os produtos SafeTile são benéficos não apenas nas áreas óbvias, como cozinhas e banheiros, mas também em quartos e salas de estar devido às suas propriedades de decomposição de odores e purificação do ar.

Observações:

Quantidades mínimas requeridas para encomenda.  
Por favor contacte-nos para mais informações.

## Ecológico

Pavimentos e revestimentos cerâmicos tornam-se mais seguros sem a utilização de químicos perigosos.

## Environmentally Friendly

Surfaces become safer without the use of dangerous chemicals.

## Auto Esterilização

A presença de substâncias orgânicas assim como bactérias e fungos são largamente reduzidos na superfície cerâmica.

## Self Sterilizing

The presence of organic substances as well as bacteria and fungus are largely reduced on ceramic surfaces.

## Superhidrofílica Ação Contínua

Permite que manchas de óleo possam ser facilmente lavadas com água. As superfícies são melhor preservadas contra sujidade e manchas.

## Superhydrophilic Continuous Action

Enable oil spots to be swept away easily with water. Surfaces are better preserved from dirt and stains.

## Purificação do Ar Decompõe Odores

Também funciona como purificador de ar que decompõe substâncias orgânicas, ajudando a reduzir a poluição do ar.

## Air Purification Decomposes Odours

The coating also works as an air purifier decomposing organic substances, helping to lower air pollution.

### International Standard Testing

Antibacterial test (ISO 27447):  
more than 95% bacterial colony  
reduction within 4 hours

Antifungal test (ISO 27447):  
more than 85% fungal colony reduction  
within 4 hours

# ANTIBACTERIAL COATING

## for cleaner and safer spaces

Especially recommended for:

**HEALTH-CARE CENTRES  
ELDERLY DAY-CARE CENTRES  
SCHOOLS  
RETAIL FOOD COURTS**

CINCA utilises a thin layer of nanoparticles subjected to a thermal process to create the special properties associated with safetile. These nanoparticles coating, with diameters generally below 100 nm, chemically bond with the tile surface during the thermal process, providing the surface of the tile with self-sterilizing properties in the presence of natural or artificial light. As a result, the presence of bacteria and fungi is largely reduced on the surface of SafeTile wall and floor tiles, also providing the decomposition of other substances as volatile organic compounds (VOC) and nitrogen oxides (NOx), potentially present in polluted atmospheres. CINCA's SafeTile products have the ability to decompose organic material and deactivate common living microorganisms, efficiently reducing the presence of bacteria, fungi, gaseous pollutants and even odours.

SafeTile products are especially recommended for large-scale public or private projects where Self Sterilizing and Super hydrophilic properties are key decision factors, as in hospitals, health-care centres and elderly day-care centres, public areas within large buildings and external cladding for multi-storey buildings, to name but a few.

In residential construction SafeTile products are beneficial not only in the obvious areas such as kitchens and bathrooms but also in bedrooms and living rooms due to their odour decomposition and air purification properties.

Please note:  
Minimum quantities required for order.  
Please contact us for more information.

20"×20"

CINZA GREY | 49x99 cm | 8621

A modern dining room with dark tables, orange chairs, and copper pendant lights. The room features a long window with a view of a city street, a tufted orange sofa, and several potted plants. The floor is made of large, light-colored tiles. The tables are set with white plates, glasses, and silverware. The chairs are a vibrant orange color with a classic design. The pendant lights are a warm copper color and have a teardrop shape. The overall atmosphere is clean, bright, and sophisticated.

CARRARA VENATINO | M25x75cm | 4104

The background is a light-colored marble with dark, irregular veins. A teal-colored banner is positioned in the upper right quadrant, containing the word 'FLOW' in white, uppercase letters. The banner has a diagonal cut on its left side.

**O símbolo classifica a variação da tonalização da cor das peças cerâmicas de uma série.**

This symbol classifies the chromatic shade variation among pieces of tile in one range.

Parmi les symboles nous indiquons le degré de variation chromatique entre les carreaux contenus dans chaque série.

Mit den Abkürzungen will man den Farbabweichungsgrad jeder Fliese einer Serie Klassifizieren.

**RECOMENDAÇÕES PARA ASSENTAMENTO**

Para obter melhores resultados das características do produto, a CINCA recomenda antes do assentamento a mistura das peças de várias caixas.

**LAYING RECOMMENDATIONS**

CINCA recommends blending different pieces from different cartons before installation, in order to maximize the aesthetic beauty of the product line.

**RECOMMANDATION POUR LA POSE**

Afin de tirer profit au mieux des caractéristiques techniques du produit, CINCA recommande de mélanger les pièces de différentes boîtes.

**HINWEISE ZUR VERLEGUNG**

Um die besten Resultate mit unserem Produkt erzielen zu können, schlägt CINCA vor, Fliesen von verschiedenen Kartons vor der Verlegung zu mischen.

≥ 24°	 <b>C</b>	<b>Alto atrito</b> High friction	

Os pavimentos cerâmicos que estão dotados de características antiderrapantes contribuem de forma eficaz e ativa para a segurança dos utilizadores. Estes produtos apresentam especificações particulares, das quais se destaca a resistência ao escorregamento. Com ampla divulgação na indústria cerâmica, as normas alemãs que permitem determinar o coeficiente de escorregamento subdividem os testes em dois grupos distintos: o escorregamento calçado, aplicável em zonas em que os utilizadores circulam normalmente calçados, e o escorregamento "pé descalço", aplicável a zonas em que os utilizadores circulam descalços, como piscinas, balneários, etc.

Os testes são conduzidos com recurso a equipamento especial e a uma pessoa que simula a circulação sobre o pavimento (ora calçado ora descalço, consoante o teste que se pretende levar a cabo), num plano inclinado que gradualmente vai aumentando o seu ângulo de inclinação. O ângulo máximo atingido antes do desequilíbrio determina o grupo de antiderrapância que permite classificar os produtos.

Ceramic floor tiles developed with slip resistant characteristics contribute actively to the safety of the users. Amongst the many particular specifications of these products, the slip resistance are notable. Well known in the Ceramic Industry, the German standards, which help determine the slip resistance coefficient, divide the tests into two groups. In the first group, the tests are executed simulating the use of footwear. In the second group, the tests are run simulating barefoot traffic in areas such as swimming pools, shower areas etc.

Special equipment is used to perform the tests and a person will simulate walking (with or without footwear, dependant on the test) on a sloping tiled surface. The slope angle is subject to a gradual increase. The highest slope angle achieved before slipping determines the slipresistance classification.

## APLICAÇÃO E MANUTENÇÃO DOS DECORADOS

APPLICATION ET ENTRETIEN DES PIÈCES DÉCORÉES

Os ladrilhos decorados da CINCA resultam de processos de decoração especiais, recorrendo a vidrados que apresentam sedutores efeitos visuais. Como peças especiais que são, requerem uma manipulação cuidadosa que preserve a sua beleza. Para a sua colocação recomendamos que as peças sejam manipuladas com cuidado, para evitar riscos, e que estejam secas e limpas. A superfície dos produtos decorados deve ser protegida durante a aplicação, evitando ao máximo o seu contato com argamassas de assentamento e/ou rejuntamento. Os eventuais excedentes de materiais de colocação devem ser imediatamente limpos, evitando-se que endureçam e colem à superfície das peças. Para limpar os excedentes de materiais de colocação deve apenas ser usada uma esponja limpa e água em abundância sendo totalmente vedada a utilização de agentes de limpeza abrasivos ou contendo ácidos.

Para a manutenção corrente dos materiais deve-se evitar o uso de detergentes enérgicos e/ou produtos ou utensílios de limpeza abrasivos pois podem causar danos irreversíveis nas peças. A limpeza deve ser assegurada apenas com recurso a água e sabão neutro.

Estes produtos podem apresentar normais diferenças de tonalidade decorrentes desta técnica de fabrico.

Les carreaux de faïence décorés CINCA, sont le résultat d'un procédé de décoration spécial, recourant à des émaux ou autres matières aux effets visuels précieux et uniques. C'est donc comme pièces « précieuses » qu'ils doivent être manipulés avec soin afin de conserver leur beauté et originalité. Pour une bonne et correcte application et pour éviter toutes rayures, nous recommandons une manipulation délicate, les pièces devant être séchées et nettoyées au préalable. La surface des pièces décorées doit être protégée durant l'application, évitant au maximum son contact avec le ciment colle et/ou le joint. Les éventuels excédents de matière doivent être immédiatement nettoyés afin d'éviter qu'ils ne sèchent et qu'ils ne collent sur la surface des pièces. Pour nettoyer ces excédents, utiliser uniquement une éponge propre bien imbibée d'eau. Il est formellement interdit d'utiliser tout produit de nettoyage abrasif ou contenant des acides.

Pour le nettoyage courant, il faut éviter tout détergent énergique et/ou produit ou ustensile de nettoyage abrasifs, au risque de causer des dommages irréversibles sur les pièces. Le nettoyage doit être fait uniquement à l'aide d'eau et de savon neutre.

Ces pièces peuvent aussi présenter des différences normales de tonalité, dérivées justement de cette technique spéciale de fabrication.

## APPLICATION AND MAINTENANCE OF DECORATIVE PIECES

VERLEGE-UND PFLEGEANWEISUNG FÜR DIE DEKORE

Decorative tiles produced by CINCA are the result of special decorative processes and techniques along with the use of glazes that offer seductive visual effects. Handling of these pieces requires careful manipulation in order to preserve its beauty. For application, we recommend pieces are handled with care to avoid scratches or breakage. It is also recommended you ensure pieces are clean and dry before application. We also recommend protection of the surface to avoid contact with glue or mortar during the application process. Any excess glue or mortar in contact with the surface should be cleaned immediately to avoid hardening or gluing. Excess glue or mortar should be removed using a clean sponge with abundant water. The use of abrasive cleaning agents or those containing acid is strictly forbidden.

For cleaning and maintenance purposes avoid using energetic detergents and abrasive utensils as these may cause irreversible damage to the decorative pieces. Only the use of clean water and neutral soap is recommended.

These products may show shading variations as a consequence of the production processes and techniques used during manufacturing.

CINCA's Dekorfliesen sind Erzeugnisse aus speziellen Dekorationsverfahren, mit Glasuren die verführerische visuelle Effekte vorweisen. Diese besonderen Fliesen sollten behutsam behandelt werden, damit sie ihre Schönheit bewahren. Bei der Verlegung dieser Fliesen empfehlen wir eine sorgsame Behandlung damit Kratzer vermieden werden, auch sollten die Fliesen trocken und sauber sein. Die dekorierte Oberfläche der Produkte sollte während der Verlegung geschützt werden, um so den Kontakt mit dem Zementmörtel und / oder Fugenmaterial zu vermeiden. Etwaige Überschüsse dieser Materialien sollten sofort von den Fliesen vorsichtig entfernt werden, um das Verhärten an der Oberfläche der Fliesen zu vermeiden. Für die Reinigung bitte ausschliesslich einen sauberen Schwamm und viel Wasser verwenden. Reinigungsmittel die Säuren enthalten oder Scheuermittel dürfen nicht verwendet werden.

Für die alltägliche Säuberung und Pflege dieser Fliesen, vermeiden Sie bitte scharfe Reinigungsmittel und/oder scheuernde Reinigungsutensilien, da diese irreversible Schäden an den Fliesen verursachen können.

Die Reinigung sollte nur mit Seife und Wasser erfolgen.

Diese Erzeugnisse können normale Brandfarbenunterschiede aufweisen, auf Grund dieser Produktionstechnik.

<sup>(1)</sup> O desvio da Dimensão de Fabrico (W) da Dimensão Nominal (N) inclui uma junta de... \ Deviation of Work Size (W) from Nominal Size (N) includes a joint of...

<sup>(2)</sup> A diferença entre a Dimensão de Fabrico (W) e a Dimensão Nominal (N) é menor que... \ Difference between Work Size (W) and Nominal Size (N) is less than...

Dimensão de Coordenação (C) = Dimensão de Fabrico (W) + Junta (J)  
Dimensão de Fabrico (W) = Dimensão da face visível (a e b) e espessura (d)

**Formatos Modulares e Não Modulares**

Podem ser considerados formatos modulares aqueles cuja dimensão nominal (de designação) é múltipla ou submúltipla do módulo M (M = 100mm segundo a ISO 1006) e cuja superfície é igual ou superior a 9000mm<sup>2</sup>.

Estes formatos são identificados por uma letra M antes da sua designação nominal (p.e.: M20x20cm). Nos formatos modulares, a dimensão nominal inclui a junta, conforme as observações seguintes. Todos os restantes formatos são considerados não modulares.

Coordinating size (C) = Work Size (W) + Joint (J)

Work size (W) = Dimension of the visible face (a and b) and thickness (d)

**Modular and Non-modular Formats**

Formats considered modular are those whose nominal dimensions are multiples or submultiples of M (according to the ISO 1006 standard, M = 100mm) and with a surface area equal or superior to 9000mm<sup>2</sup>.

These formats are identified by a letter M before their nominal designation (e.g.: M20x20cm). In modular formats, the nominal size includes the joint, as described in the following remarks. All other formats are considered non-modular.

Dimension de Coordination (C) = Dimension de Fabrication (W) + Joint (J)  
Dimension de Fabrication (W) = Dimension de la face visible (a e b) et épaisseur (d)

**Formats Modulaires et Non Modulaires**

Peuvent être considérés modulaires les formats dont la dimension nominale est multiple ou sous multiple du module M (M = 100mm selon la norme ISO 1006) et dont la surface est égale ou supérieure à 9000mm<sup>2</sup>. Ces formats sont identifiés pour la lettre M avant sa désignation nominale (ex: M20x20cm). Dans les formats modulaires, la dimension nominale inclut le joint, selon les observations suivantes. Tous les autres formats sont considérés non modulaires.

Koordinationsmass (C) = Produktionsmass (W) + Fuge (J)  
Produktionsmass (W) = Grösse der Sichtfläche (a und b) und Stärke (d)

**Modulformate und Nicht-Modulformate**

Formate gelten als modular wenn deren Nennmass ein Vielfaches oder Teiler des Moduls M (M = 100mm nach ISO 1006) und deren Oberfläche grösser oder gleich 9000mm<sup>2</sup> ist. Diese Formate werden mit dem Buchstaben M vor dem Format gekennzeichnet (z.B.: M20x20cm). Bei den Modul-Formaten, ist die Fuge bereits mitberücksichtigt, wie in den folgenden Anmerkungen beschrieben wird. Alle anderen Formate werden als nicht-modular betrachtet.

<p><b>Grupo BIa</b> Group BIa (Anexo G) <b>Porcelânico Plena Massa, Decorado</b> Full Body Porcelain Tiles, Decorated <b>Porcelanato Vidrado</b> Glazed Porcelain Stoneware</p>	<p><b>Grupo BIb</b> Group BIb (Anexo H) <b>Grés Vidrado</b> Glazed Floor Tile</p>	<p><b>Grupo BIII</b> Group BIII (Anexo K) <b>Faiança Vidrada</b> Glazed Wall Tile</p>
<p>A dimensão nominal inclui uma largura de junta entre 2 e 5 mm. A dimensão de fabrico do produto situa-se pois entre 2 a 5mm abaixo da dimensão nominal de designação do produto (p.e. para um M20x20cm poderá ser 197x197mm). Para formatos não modulares a diferença da dimensão de fabrico para a dimensão nominal não pode ser superior a ± 2% ou máx. 5mm.</p>		
<p>Dada a grande retração (7 a 8%) que sofre o material durante o processo de cozedura, a dimensão de fabrico (igual a calibre) é determinada no processo, durante a fase de escolha, e impressa em cada embalagem, (p.e.: o M20x20cm pode ter calibres 196,197 ou 198mm).</p>	<p>--</p>	
<p>For modular formats, the nominal dimensions of the modular formats include a joint that varies from 2 to 5mm. The production size is therefore 2 to 5mm smaller than the nominal dimension of the format (e.g.: M20x20cm might be 197x197mm). For non-modular formats the difference between the production size and the nominal size cannot be higher than ± 2% or max. 5mm.</p>		
<p>Due to the high contraction (7 to 8%) of the material during the firing process, the production size (also designated as the caliber) is determined within the process, when the final selection is made. The size (caliber) is printed onto each box (e.g.: M20x20cm may have calibers of 196,197 or 198mm).</p>	<p>--</p>	
<p>Pour les formats modulaires, la dimension nominale inclut une largeur de joint entre 2 et 5mm. La dimension de fabrication du produit se situe donc entre 2 et 5mm en dessous (ex: pour un M20x20cm elle pourra être 197x197mm). Pour les formats non modulaires l'écart entre la dimension de fabrication et la dimension nominale ne peut être supérieure à ±2% ou max. 5mm</p>		
<p>Du fait de la grande rétraction (7 à 8%) dont souffre le matériel durant la cuisson, la dimension de fabrication (appelée aussi calibre) est déterminée pendant la phase de tri et imprimée sur chaque emballage (ex: le M20x20cm peut avoir les calibres 196,197 ou 198mm)</p>	<p>--</p>	
<p>Enthält das Nennmass der Modul-Formate eine Fugenbreite zwischen 2 und 5mm. Das Produktionsmass des Produktes ist somit zwischen 2 und 5mm kleiner als das Nennmass (z.B.: ein M20x20 kann 197x197mm sein). Für Formate die nicht modular sind darf der Unterschied zwischen dem Produktionsmass und dem Nennmass nicht grösser sein als ± 2% oder max. 5mm.</p>		
<p>Auf der anderen Seite wird, wegen der grossen Schrumpfung (7 bis 8%) das das Material während des Brennens erleidet, das Produktionsmass (= Kaliber) während dem Prozess, in der Sortierung ermittelt und auf jeden Karton gedruckt (z.B.: M20x20cm kann die Kaliber 196,197 oder 198mm ha ben).</p>	<p>--</p>

## NOTAS

NPD - Desempenho Não Determinado.

(1) Percentagem de ladrilhos livres de defeito visual que possa afectar o aspecto numa área importante. Pequenas variações de cor em virtude do processo de cozedura, irregularidades intencionais de cor, manchas ou pontos coloridos podem ser característicos de um determinado produto e não são considerados como defeito.

(2) A resistência à flexão varia de formato para formato. Os valores declarados são os valores mínimos para cada categoria de espessura. Para mais informações por favor contacte os serviços comerciais da CINCA.

(3) Apenas aplicável a pavimentos.

(4) Apenas aplicável a produtos destinados à aplicação no exterior.

(5) A determinação laboratorial da aderência dos ladrilhos cerâmicos aos cimentos-cola é de teor indicativo e apenas relevante em circunstâncias específicas, designadamente, segundo a norma harmonizada, "apenas quando o ladrilho for utilizado em paredes sujeitas a requisitos contra a queda de objectos em áreas transitáveis.". Os valores obtidos e declarados resultam de ensaios em condições laboratoriais ideais e poderá não existir correlação entre a aderência declarada e o desempenho do cerâmico em uso, pois factores como as técnicas de aplicação e tipos de suporte influenciam fortemente o desempenho final.

(6) Apenas para cores lisas onde pequenas diferenças de cor sejam importantes na especificação. Para mais informações por favor contacte os serviços comerciais da CINCA.

(7) Os ladrilhos cerâmicos, dado serem incombustíveis, são classificados na classe A1 «nenhuma contribuição para o fogo» e são considerados sem necessidade de teste (CWT) de acordo com a Decisão da Comissão 96/603/CE, como emendada.

(8) O ensaio para altas concentrações de ácidos e bases é apenas aplicável a produtos que se destinem a ser usados em situações potencialmente corrosivas. Para mais informações por favor contacte os serviços comerciais da CINCA.

(9) Apenas para ladrilhos cerâmicos que se destinem a ser usados em mesas de trabalho ou paredes em locais onde ocorra a preparação de alimentos e onde estes estejam em contacto directo com a superfície vidrada. Os valores apresentados são indicativos e podem ser alterados sem aviso prévio. Caso tenha intenção de utilizar os produtos nestas circunstâncias por favor contacte os serviços comerciais da CINCA.

(10) Apenas serão realizados ensaios quando relevante considerando regulamentos europeus ou leis, regulamentos ou provisões administrativas. Os ensaios relevantes serão executados a pedido do cliente após a análise das leis ou regulamentos localmente aplicáveis. Para mais informações por favor contacte os serviços comerciais da CINCA.

(11) Ao abrigo do Regulamento (CE) N.º 1907/2006 do Parlamento Europeu e do Conselho de 18 de Dezembro de 2006 (REACH), artigo 3º, n.º 3 os pavimentos e revestimentos cerâmicos são considerados artigos, não se prevendo a libertação de quaisquer substâncias em condições de utilização normais ou razoavelmente previsíveis, razão pela qual não é necessária qualquer ficha de dados de segurança para a sua colocação no mercado, transporte ou utilização.

(12) Os pavimentos e revestimentos cerâmicos não se encontram classificados como substâncias perigosas de acordo com o Regulamento (CE) N.º 1272/2008 do Parlamento Europeu e do Conselho de 16 de Dezembro de 2008.

## NOTES

NPD - No Performance Declared.

(1) Percentage of tiles free from any visual defect that could impair the appearance of a major area of tiles. Slight color variations due to the firing process, intentional irregularities of colors, spots or colored dots could be characteristic of a given product and are not considered as a defect.

(2) The breaking strength varies from size to size. The stated values are minimum values for each tickness category. For more informations please contact CINCA commercial services.

(3) Only applicable to floor tiles.

(4) Only applicable to tiles intended to use on exterior areas.

(5) The laboratorial determination regarding the adhesion of ceramic tiles to mortar / cement glue is merely indicative and relevant only under certain specific circumstances, namely, according to the harmonized standard, "only when the tile is used on walls subject to requisites against the fall of objects in trafficable areas.". The results obtained and declared are a result of tests carried out under ideal laboratorial conditions, and therefore a correlation between the declared adhesion results and the performance of the tile in use may not exist, since application techniques and the different types of support can strongly influence the final performance.

(6) Only for plain color tiles where small colour differences are important in a specification. For more informations please contact CINCA commercial services.

(7) Given ceramic tiles are non combustible, they're classified in Class A1 "no contribution towards fire" and as such the CWT test is not required in accordance with the Decision of the Comission 96/603/CE, as amended.

(8) The test for high concentration of acids and alkalis is only intended for ceramic tiles which are to be used in potentially corrosive conditions. For more informations please contact CINCA commercial services.

(9) Only for glazed ceramic tiles when intended to use on worktops and/or wall surfaces where food preparation takes place and food may be in direct contact with the glazed surface of the tile. Please take note that these figures are subject to changes without further notice. Please contact CINCA commercial services if you intend any of the referred uses.

(10) Only tested when relevant considering european regulations or national laws, regulations or administrative provisions. The relevant tests could be conducted by request from customers after analisis of the local applicable laws and regulations. Please contact CINCA commercial services for more information.

(11) Under Regulation (EC) No. 1907/2006 of the European Parliament and of the Council of 18th of December 2006 (REACH), article 3, number 3, floor and wall tiles are considered articles and are not expected to release any substances when used in normal and reasonably predicted conditions, reason why any safety data sheet for its fixing, transport or use in the market, is not necessary.

(12) Wall and floor tiles are not classified as hazardous according to the Regulation (EC) No. 1272/2008 of the European Parliament and of the Council of 16th of December 2008.

## NOTES

NPD - Performance Non Déterminée.

(1) Pourcentage de carreaux libres de défaut visuel qui puisse altérer l'aspect d'une surface importante. Faibles variations de couleurs dues au procédé de cuisson, irrégularités intentionnelles de couleur, tâches ou points colorés peuvent être considérés comme une caractéristique du produit et non un défaut.

(2) La résistance à la flexion varie de format à format. Les valeurs déclarées sont les valeurs minimales pour chaque catégorie d'épaisseur. Pour plus d'informations, merci de contacter les services commerciaux de Cinca.

(3) Seulement applicable pour les carreaux de sol

(4) Seulement applicable pour les produits appliqués en extérieur.

(5) L'adhérence du carrelage aux mortiers colles est à titre indicatif et exclusivement indispensable, notamment, selon la norme harmonisée «quand le carrelage est utilisé pour des murs soumis aux exigences contre la chute d'objet dans des zones circulables». Les résultats obtenus et déclarés proviennent d'essais en laboratoire, donc il est possible qu'il n'existe aucune corrélation entre l'adhérence déclarée et la performance du carrelage, car la mise-en-œuvre et le type de support sont des facteurs qui influencent fortement la performance finale.

(6) Seulement pour les teintes unies où les faibles différences de couleurs sont importantes dans la prescription. Pour plus d'informations, merci de contacter les services commerciaux de Cinca.

(7) Les carreaux céramiques sont incombustibles et appartiennent donc à la classe A1 "Aucune contribution à l'incendie", ils sont exemptés du test (CWT) en accord avec la Décision de la Commission 96/603/CE, comme amendé.

(8) Le test pour les hautes concentrations d'acides et de bases est seulement fait pour les produits destinés à être utilisés en situation potentiellement corrosive. Pour plus d'informations, merci de contacter les services commerciaux de Cinca.

(9) Seulement valable pour les carreaux en céramique destinés à être utilisés comme plan de travail ou sur des murs situés dans des zones de préparation de produits alimentaires et où ceux-ci sont en contact direct avec la surface émaillée. Les valeurs présentées sont indicatives et elles peuvent être changées sans avis préalable. Dans le cas où vous avez l'intention d'utiliser les produits dans ces circonstances, merci de contacter les services commerciaux de CINCA.

(10) Les tests seront seulement réalisés s'ils s'avèrent pertinents face aux réglementations européennes ou face aux lois, règlements et dispositions administratives. Les tests seront alors exécutés sur demande du client après l'analyse des lois ou des règlements applicables localement. Pour plus d'informations, merci de contacter les services commerciaux de Cinca.

(11) Sous la Réglementation (CE) N° 1907/2006 du Parlement Européen et du Conseil du 18 Décembre 2006 (REACH), article 3°, paragraphe 3, les sols et revêtements céramiques sont considérés comme des articles dont la libération de quelconques substances en conditions d'utilisation normales ou raisonnablement prévisibles n'est pas prévue, raison pour laquelle aucune fiche de données de sécurité pour son application dans le marché, transport ou utilisation n'est nécessaire.

(12) Les sols et revêtements céramiques ne sont pas considérés comme des substances dangereuses selon la Réglementation (CE) N° 1272/2008 du Parlement Européen et du Conseil du 16 Décembre 2008.

## ANMERKUNGEN

NPD - keine Leistung festgelegt.

(1) Prozentsatz der mäßelfreien Fliesen, die die visuelle Erscheinung eines wichtigen Bereich beeinflussen können. Geringe Farbabweichungen aufgrund des Brennvorgangs, Unregelmäßigkeiten bei Intensität der Farben, Flecken oder Punkte können Eigenschaften eines bestimmten Produktes sein und werden nicht als Fehler anerkannt.

(2) Die Biegefestigkeit ist von Format zu Format unterschiedlich. Die angegebenen Werte sind die Mindestwerte je Stärkeklasse. Für weitere Informationen wenden Sie sich bitte an die Vertriebsabteilung von CINCA.

(3) Nur für Bodenfliesen anwendbar.

(4) Nur für Produkte die für die Anwendung im Aussenbereich geeignet sind.

(5) Die labortechnische Bestimmung der Haftung der Keramikfliesen am Zementkleber ist nur als indikativ zu betrachten und nur in bestimmten Fällen relevant, insbesondere nach der harmonisierten Norm, „nur bei Anwendung der Fliesen an Wände, die die Anforderungen gegen herabfallende Gegenstände in begehb- oder befahrbaren Bereichen erfüllen.“. Die erhaltenen und angegebenen Werte, sind Resultate aus Labortests unter optimalen Laborbedingungen. Es kann daher nicht gewährleistet werden, das die angegebene Haftung, den tatsächlichen Ergebnissen vor Ort entspricht, da verschiedene Faktoren, wie z.B. die Verlegetechnik und die verschiedenen verwendeten Materialien, die tatsächliche Haftung erheblich beeinflussen.

(6) Nur für Unifarben bei denen geringe Farbunterschiede wichtig in der Spezifikation sind. Für weitere Informationen wenden Sie sich bitte an die Vertriebsabteilung von CINCA.

(7) Keramikfliesen sind nicht brennbar und werden daher als Material der Klasse A1 "nicht Brand fördernd" eingestuft. Sie unterliegen keiner Prüfungsnotwendigkeit (CWT), gemäss der überarbeiteten Entscheidung der Kommission 96/603/CE.

(8) Die Prüfung gegen hohe Konzentrationen von Säuren und Laugen ist nur anwendbar für Produkte, die dafür gedacht sind in potenziell korrosiven Situationen verwendet zu werden. Für weitere Informationen wenden Sie sich bitte an die Vertriebsabteilung von CINCA.

(9) Nur für Keramikfliesen, die dafür bestimmt sind, auf Arbeitsflächen oder Wänden benutzt zu werden, in Räumen in denen Lebensmittel verarbeitet werden und diese in direktem Kontakt zur Glasierung kommen. Es handelt sich hierbei um Richtwerte, die ohne Vorankündigung geändert werden können. Wenn Sie die Produkte für diese Verwendung benutzen möchten, kontaktieren Sie bitte zunächst die Vertriebsabteilung von CINCA.

(10) Prüfungen werden nur durchgeführt falls notwendig, und unter Beachtung der europäischen Vorschriften oder Gesetze, Verordnungen oder Verwaltungsvorschriften. Die entsprechenden Prüfungen werden auf Kundenwunsch, nach Beachtung der örtlich geltenden Gesetze oder Vorschriften durchgeführt. Für weitere Informationen kontaktieren Sie bitte die Vertriebsabteilung von CINCA.

(11) Gemäß der Verordnung (EG) Nr. 1907/2006 des Europäischen Parlamentes und des Rates vom 18. Dezember 2006 (REACH), Artikel 3, Nr. 3, sind keramische Wand- und Bodenfliesen als Artikel eingestuft, die bei normaler Verwendung keinerlei Stoffe absondern und deshalb keinerlei Sicherheitsdatenblatt benötigen, um auf den Markt gebracht, transportiert oder verwendet zu werden.

(12) Die keramischen Wand- und Bodenfliesen sind nicht als gefährliche Stoffe klassifiziert, gemäß der Verordnung (EG) Nr. 1272/2008 des Europäischen Parlamentes und des Rates vom 16. Dezember 2008.

### CERTIFICADOS DE SISTEMAS

#### MANAGEMENT SYSTEM CERTIFICATES

Certificação ISO 9001 do Sistema de Gestão da Qualidade Implementado na Conceção, Desenvolvimento, Produção e Comercialização de Pavimentos e Revestimentos Cerâmicos

Quality Management System ISO 9001 Certification Implemented in the Design, Development, Production and Trading of Ceramic Floor and Wall Tiles

Certificação ISO 14001 do Sistema de Gestão do Ambiente Implementado na Conceção, Desenvolvimento, Produção e Comercialização de Pavimentos e Revestimentos Cerâmicos

Environment Management System ISO 14001 Certification Implemented in the Design, Development, Production and Trading of Ceramic Floor and Wall Tiles

### CERTIFICADOS DE PRODUTOS

#### PRODUCT CERTIFICATES

Certificação da Qualidade de Revestimentos Cerâmicos  
Wall Tiles Quality Certification

### OUTROS CERTIFICADOS

#### OTHER CERTIFICATES

**APICER - Associação Portuguesa da Indústria de Cerâmica**  
(Portuguese Association of the Ceramis Industry)

O Selo 'Portugal Does It better' é atribuído pela APCER a empresas que ambicionam o patamar de excelência definido para processos produtivos e gestão, na qualidade, na inovação, no design ou no respeito ambiental e social.

The Seal 'Portugal Does It better' is awarded by APCER to companies that aspire to the level of excellence set for production processes and management, quality, innovation, design or environmental and social respect.

## CERTIFICADOS AMBIENTAIS ENVIRONMENTAL CERTIFICATES

### U.S. Green Building

Na sequência do seu comprometimento com o desenvolvimento sustentável, a CINCA é membro do U.S. Green Building Council® (USGBC®), uma das mais prestigiadas organizações dedicadas à construção sustentável. O USGBC agrupa mais de 13.000 organizações de todo o mundo e mais de 180.000 profissionais em torno da visão de que é possível desenvolver na próxima geração um padrão de construção ambientalmente sustentável, modificando a forma como os edifícios são concebidos, construídos e geridos. A USGBC gere o LEED® (Leadership in Energy and Environmental Design), o mais amplamente reconhecido sistema de certificação verde da construção em todo o mundo que abrange a concepção, construção, gestão e manutenção de edifícios, casas e comunidades. Mais de 148.000m<sup>2</sup> de construção em mais de 130 países são certificados diariamente pelo sistema LEED.

Following its commitment towards sustainable development, CINCA is a member of U.S. Green Building Council® (USGBC®), one of the most prestigious organizations dedicated to sustainable construction. USGBC groups more than 13.000 organizations worldwide and more than 180.000 professionals around a vision that it is possible to develop in the upcoming generations construction standards that are environmentally sustainable, by changing the way buildings are conceived, built and managed. USGBC manages LEED® (Leadership in Energy and Environmental Design), the most broadly recognized green certification system for construction, covering all different stages from conception, to construction, management and maintenance of all buildings, houses and communities. More than 148.000m<sup>2</sup> of construction are LEED certified on a daily basis all around the world.

### Greenguard Gold

Certificação de Revestimentos e Pavimentos  
Wall and Floor Tiles Certification

Os produtos que usamos para construir e mobiliar ambientes interiores podem ter um impacto significativo sobre os níveis de poluição do ar interior. A CINCA obteve a Certificação Ouro GREENGUARD para os seus Pavimentos e Revestimentos Cerâmicos. A GREENGUARD comprova cientificamente, que os produtos que certifica cumprem alguns dos padrões mundiais mais rigorosos, relativamente a emissões químicas de terceiros - ajudando a reduzir a poluição do ar interior e o risco de exposição a substâncias químicas, enquanto auxilia a criação de ambientes internos mais saudáveis. A Certificação GREENGUARD é reconhecida e referenciada em inúmeros programas de construção, normas e especificações em todo o mundo. Os produtos com certificação GREENGUARD ou certificação Gold GREENGUARD podem contribuir para o cumprimento de alguns pontos em sistemas de classificação ambientais estabelecidos para edifícios (como o sistema LEED® gerido por USGBC®), satisfazer critérios de código ou portaria e atingir requisitos específicos de RFP qualidade do ar interior.

The products that we use to build and furnish our indoor environments can have a significant impact on indoor air pollution levels. CINCA have obtained the GREENGUARD Gold Certification for its Ceramic Floor and Wall Tiles. Products that have achieved GREENGUARD Certification are scientifically proven to meet some of the world's most rigorous, third-party chemical emissions standards — helping reduce indoor air pollution and the risk of chemical exposure while aiding in the creation of healthier indoor environments. The GREENGUARD Certification is recognized and referenced in numerous building programs, standards and specifications around the world. Products with GREENGUARD Certification or GREENGUARD Gold Certification can contribute to the achievement of points in established green building rating systems (as the LEED® system managed by USGBC®), satisfy code or ordinance criteria and meet indoor air quality specific RFP requirements.
